### Academics

The academic program in the Augusta Public Schools has a strong tradition of and commitment to the acquisition of core knowledge and skills in the *language arts, mathematics, science, social studies, and the fine arts*. The Augusta Public Schools' academic offerings are well-rounded with quality academic programs in *physical education, foreign languages (6-12), health, and technology*. For each of these disciplines a sequential comprehensive and coordinated academic program is in place to help students meet their highest potential.

The academic areas of study are enhanced by a myriad of student support programs that address the needs of various students. They are: **Special Education Program, Gifted and Talented Program, Guidance Program, Library Media Program, English as a Second Language Program, Alternative Programs, and the regional Vocational Program.**

The academic program is guided by a set of **Student Expectations** that were approved by the Augusta School Board in April 1995. The Student Expectations are the broad educational goals from which all curricula are derived.

In developing curricula, the Augusta Public Schools build **curricula** so that each curriculum is sequential, measurable, and consistent across grade levels in the district. The curricula are fluid documents that are re-examined periodically to meet the needs of a changing society, to reflect best practices in education, and to meet **State Learning Results** and national standards.

## Capital Area Technical Center, grades 9-12

serving HS students from Cony and 8 other Central Maine school districts

Pierce Dr.

Augusta, ME 04330

Phone: 207-626-2475

Pam Kenoyer, Director

**00-01 enrollment: 219**

The Capital Area Technical Center is dedicated to providing quality technical education and to encouraging students in the pursuit of further education and training beyond high school. CATC offers Co-op, Pre-Apprenticeship and Maine Career Advantage as well as short term job shadows and experiences. There is emphasis in all programs on job skill preparation including portfolio development. CATC encourages partnership with business and industry to enhance education and training opportunities for students.

### Technical Programming Offerings

**Biotechnology** -- The biotechnology program is a one year class to learn the equipment, techniques, and background needed to work in a biotechnology lab or to prepare for a career in biotechnology, medicine, biological science, or other related field.

**Machine Tool** -- Students prepare to enter the Machine Tool industry or technical college programs through extensive lab work in conventional machining processes and classroom experiences.

**Drafting** -- From the basics of design to computer aided drafting, this program prepares students for entry-level positions within the industry, while providing an excellent foundation for those who are planning a career in engineering.

**Health Occupations** -- This program introduces students to various occupations in the health field and offers a strong foundation of learning for those who plan to further their education in any health area.

**Marketing Management** -- This course is designed to provide a broad understanding of the techniques used in processing business data in modern offices and computer facilities, to prepare students for entry level positions in the computer operations of banking, business, and wherever computers are used.

### Additional offerings:

Auto Body

Auto Technology

Carpentry

Co-operative Education

Diversified Occupations

Early Childhood Occupations

Food Service

Graphic Arts

Law Enforcement

Multi-Media

Plumbing and Heating
